

EXPANSION JOINT SOLUTIONS FOR TRANSPORTATION

PERFORMANCE AND PROTECTION IN NEW CONSTRUCTION, MAINTENANCE AND PRESERVATION

Structures are made to move. Often overlooked, expansion joints add to their overall integrity by giving them the flexibility to move with the surrounding substrate. Without expansion joints, concrete and structures would eventually crack and fall apart over time.

Water damage can be equally damaging. Unseen leaks over time may corrode and degrade the structure's integrity.

For 70 years, WBA has proudly led the industry in the manufacture and design of expansion joint systems to meet the unique demands of projects across the globe. We are committed to providing our customers with the most efficient and responsible solutions.
